

The 10th ODC Training Course on Regional Application of Coupled Climate Models

5-16 July 2021

Hybrid of Online and Onsite (Qingdao)

The ODC center aims to promote the international cooperation and enhance the research capacity and capability in the Western Pacific and adjacent areas on ocean dynamics, air-sea interactions, climate change and numerical modeling. Through the provision of annual training course and research opportunities by the ODC center, an early career professional network has been developed in the region.

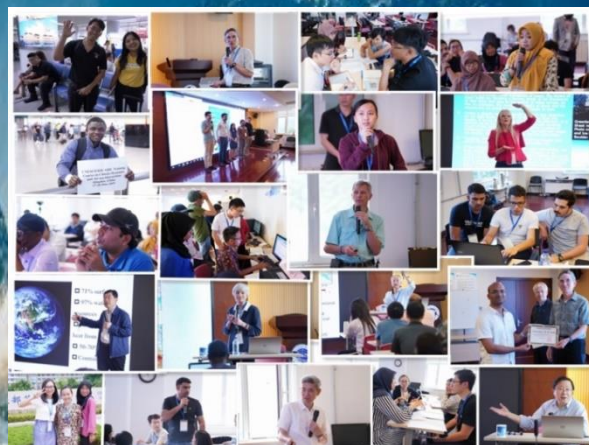

Objectives

To improve young scientists' capabilities to utilize the simulation and prediction products

To promote interactions on the state-of-the-art researches on regional climate system

To strengthen and scale up a network of early career professionals on ocean and climate

To further enhance regional coordination in the context of the Ocean Decade

Online application:
